

2A Step-down DC/DC

Features

- 2A Output Current
- 0.15Ω Internal Power MOSFET Switch
- Stable with Low ESR Output Ceramic Capacitors
- Up to 95% Efficiency
- 30μA Shutdown Mode
- Fixed 385kHz Frequency
- Thermal Shutdown
- Cycle-by-Cycle Over Current Protection
- Wide 6.5V to 24V Operating Input Range
- Output Adjustable from 1.22V to 21.6V(G5762)
- Output Adjustable from 0.92V to 21.6V(G5762A)
- Available in SOP-8 Package

Applications

- PC Monitors
- DSL Modems
- Distributed Power Systems
- Pre-Regulator for Linear Regulators

General Description

The G5762 is a monolithic step-down switch mode regulator with a built in internal power MOSFET. It achieves 2A continuous output current over a wide input supply range with excellent load and line regulation.

Current mode operation provides fast transient response and eases loop stabilization.

Fault condition protection includes cycle-by-cycle current limiting, output short circuit protection and thermal shutdown. In shutdown mode the regulator draws 30μA of supply current. Programmable soft-start overwrites the internal soft-start for various requirement of output power up ramp and minimizes the inrush supply current at initial startup.

The G5762 requires a minimum number of readily available standard external components. It is available in a SOP-8 package.

Ordering Information

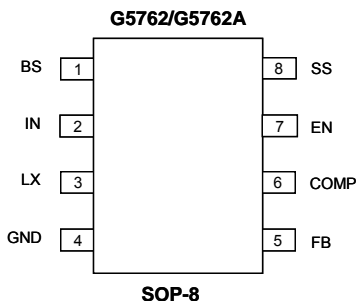

ORDER NUMBER	MARKING	TEMP. RANGE	PACKAGE (Green)
G5762P11U	G5762	-40°C to +85°C	SOP-8
G5762AP11U	G5762A	-40°C to +85°C	SOP-8

Note: P1: SOP-8

1: Bonding Code
